Training Course on "Waste Management" at the Faculty of Agriculture, Samarra University

June 2, 2025 • UOSAGRP College of Agriculture Author:

In light of the increasing environmental challenges, the Faculty of Agriculture at the University of Samarra organized an important training course entitled "Waste Management", which shed light on one of the most serious environmental problems facing the world today.

The course was presented by Ms. Mab Noman Laheeb, who gave a scientific presentation rich in information and modern trends in waste management, highlighting sustainable treatment methods and the role of society in achieving a clean and safe environment.

The course dealt with the different types of waste, from solid and liquid to electronic and hazardous, and ways to manage them with scientific methods including: reducing consumption, reuse, recycling, and safe disposal. The possibilities of converting waste into energy using modern technologies were also reviewed, while stressing the need to enhance environmental awareness and activate the role of citizens in protecting the environment.

Recommendations of the session:

The need to strengthen the legislation that obliges the proper management of waste.

Supporting community initiatives for recycling and reuse.

Intensifying awareness campaigns on the harms of waste and ways to deal with it properly.

This course reflects the keenness of the Deanship of the College, represented by Prof. Dr. Khalid Abdullah Sohr, to keep pace with contemporary environmental issues, and to support training programs aimed at raising the level of academic and community awareness, in order to enhance the role of the College as an effective scientific institution in serving the environment and sustainable development.

كلية العلوم التطبيقية بجامعة سامراء تنظم حملة توعوية عن تقليل النفايات

نظمت كلية العلوم التطبيقية في جامعة سامراء، حملة توعوية بعنوان "تقليل النفايات ضرورة بيئية واقتصادية"؛ بهدف نشر ثقافة الاستدامة بين الطلبة والمجتمع المحلي.

ويعد تقليل النفايات ركن أساسي في منع توليدها، أو تحويلها إلى منتجات صديقة للبيئة مثل: السماد والغاز الحيوي، كذلك تقليل النفايات لا يمثل عملاً فردياً فحسب، بل هو جزء من استراتيجية وطنية وعالمية؛ لتحقيق التنمية المستدامة والحفاظ على الموارد الطبيعية للأجيال المقبلة.

وتأتي هذه الحملة ضمن أنشطة الكلية الرامية إلى تقوية الوعي البيئي وتفعيل دور المؤسسات التعليمية في خدمة المجتمع.

Samarra University's College of Applied Sciences Organizes an Awareness Campaign on Waste Reduction .The College of Applied Sciences at Samarra University organized an awareness campaign entitled "Waste Reduction: An Environmental and Economic Necessity," aiming to promote a culture of sustainability among students and the local community.

Waste reduction is a fundamental aspect of preventing its generation or converting it into environmentally friendly products such as compost and biogas. Furthermore, waste reduction is not merely an individual effort, but rather part of a national and global strategy to achieve sustainable development and preserve natural resources for future generations.

This campaign is part of the college's activities aimed at strengthening environmental awareness and activating the role of educational institutions in serving the community.

A group from the University of Samarra participate in the course on chemical, biological and radiological accidents at the Directorate of Civil Defense

By University Presidency - Media Center • November 11, 2022 • Reading Time: 1 minute

Samarra University staff participated in the Training and Rehabilitation Division course at the Civil Defense Directorate, which was held on "Responding to Chemical, Biological, Radiological and Nuclear Accidents (CBRN).

The seminar, delivered by Lieutenant Colonel Qahtan Adnan Yaqoub, and lasted for seven days, aims to introduce the staff working in these fields to the mechanism for responding to accidents that may occur in and outside laboratories and the best ways to deal with them.

After the course ended, some accidents were applied to enhance the university staff's ability to deal with such incidents in the laboratories and train students while studying them.
